

Learning to See Waste

Would you like to *experience* the benefits of Lean manufacturing?

Offered as part of the Lean Practitioner Certification

Your instructor:

Jeremiah Johnson, a Senior Global Enterprise Excellence Manager at Boston Scientific, is responsible for deploying continuous improvement methodologies, tools and culture across three of Boston Scientific's divisions and the Global IT group.

"The simulation was a great exercise – emphasized the implementation of Lean concepts and showed results of that implementation."

Renee Thurmer
Project Manager
Cell Culture Company

For many, the first step in creating a culture of continuous improvement and developing an army of problem solvers is to help all employees identify opportunities for improvement. Participants gain knowledge and the tools required in order to help a critical mass of employees learn how to define value and identify and eliminate waste. They will participate in an interactive business simulation game that demonstrates, in a practical manner, the application of Lean principles. After completing the workshop, participants will have experienced the difference between traditional and Lean manufacturing and its components.

Tools and Topics Learned Include:

- Kanban
- Takt Time
- Visual Controls
- Kaizen Events
- Teamwork
- Value Stream Mapping
- Cellular Manufacturing
- Work Standardization

Wednesday, February 9, 2022 8:00 a.m. - 4:00 p.m.
