

Managing for Daily Improvement

Transitioning from making improvements to coaching others to solve problems.

Part of the Sr. Lean Practitioner Certification

Your instructor:

Ron Mrocek is the Director of Operations for the nVent Anoka facility. He has held positions in Lean, Materials and Operations with over 18 years of Lean Manufacturing experience. His experience as a shop floor associate to his current position, has taught him that you are never done learning or continuously improving. He was part of implementing nVent's first Material Flow system, and most recently driving systems such as RCCM and MDI.

It is not easy to make the transition from making improvements yourself to helping others solve problems. But, seeing your team sustain higher levels of performance makes it worth it. In this experiential workshop you will learn how to systematically develop the tools and resources needed to support your team in making improvements daily.

Course Objectives:

- ◆ Define the Sr. Lean Practitioner Model
- ◆ Interpret performance indicators to determine gaps and trends
- ◆ Learn how team huddles provide shared understanding & action
- ◆ Demonstrate understanding of Leaders Standard Work
- ◆ Identify the purpose and types of Gemba Walks
- ◆ Practice coaching to develop problem solvers

Who Should Attend: Team Leads, Supervisors, and Managers. Participants should currently have responsibility for a team.

Tuesday, November 22, 2022 8:00am – 12:00pm
