

Visual Management & 5S Improvements

Offered as part of the Lean Practitioner Certification

Your instructor:

Scott Bliss is President of Innovize. He has more than 20 years of medical device leadership experience in manufacturing, developing associates, improving processes, and successfully launching new products. Scott holds a BS in Mechanical Engineering from the University of Minnesota and a MS in Manufacturing Systems from the University of St. Thomas.

“A key takeaway from this workshop: changing how you think - identifying waste when walking through the facility or office”

Steve Rice, Dir. Quality
Hamon Deltak Inc

Customers, employees and suppliers can tell a well-run plant and office without a narrated tour. The visual clues are everywhere. This is a straight-forward approach that impacts your customer and employee image, productivity and sales. The many facets of visual management and 5S can allow employees to show pride and organization in their area, give them performance feedback, provide incentive to hit their goals, illustrate what is expected of them and recognize a job well done. These techniques can help overcome language and reading barriers and boost learning retention too.

Tools and Topics Learned Include:

- Visual display boards
- Standard work boards
- Visual control boards
- Color-coding time savers
- Motivating teams for higher performance
- Pictorial procedures
- Visual performance measurements
- 5S organizing and housekeeping
