

Learning to Solve Problems

Lean Practitioner Certification Project Coaching

In this workshop Jeremy Blake will coach you in how to be successful from project set-up to completion.

Your instructor:

Jeremy Blake is passionate about supporting leaders in their growth. He is currently a Leadership & Development Coach with Manufacturers Alliance and has 8 years of experience working in manufacturing as a Machine Operator, Continuous Improvement Leader, Operational Excellence Leader, and Quality Manager. Jeremy holds a Lean Practitioners Certification as well as a 6 Sigma Green Belt Certification.

Pre-work:

Participants are expected to complete the following before class:

- Complete project idea proposal form
 - Project topic first draft
 - Problem statement first draft
 - Workshop tools/skills application

Course Objectives:

- Recognize and mitigate bias
- Objectively define problems
- Learn where, how and when to access resources
- Apply the Project Template as a project management tool

After completing this workshop you will be able to:

- Write an effective problem statement
- Successfully fulfill project requirements

Who Should Attend: Anyone currently enrolled in a certification from Manufacturers Alliance.

Wednesday, May 24 , 2023
